FOR IMMEDIATE RELEASE**

Visique is expanding with 2 new clinics opening in the greater Metropolitan area

Quebec City, QC (July 20, 2017) – Visique banner is already expanding and opening 2 new optometry clinics this week in the Metropolitan area. One situated in Brossard, at DIX30 and the other in Pointe-Claire.

These new clinics give Visique the opportunity to grow their network in more regions of Québec. « Visique is committed to provide the personal eye care and quality for their patients. By opening 2 new clinics, our brand is proving its importance in the Québec market, this confirmed by Dr. Frédéric Marchand, Optometrist and Vice-President of Visique in Québec. Both clinics at DIX30 and Pointe-Claire were specifically chosen to respond to patient demand in those regions. They can benefit by the advanced technology and sophisticated equipment to obtain precise diagnostic concerning their eye health. »

Visique will continue to grow across Québec, and more specifically a new clinic opening this fall in Lachenaie on the North Shore of Montréal.

Visique announced in June that it would regroup 45 clinics and 78 optometrists under one unified banner.

About Visique

Visique is a private, optometrist-owned and operated eye care brand that operates as a part of FYidoctors, the country's largest provider of ophthalmic products and services with over 525 optometrists servicing over 275 locations. Since 2015, several Quebec banners, including Marchand Giguere, have joined forces with FYidoctors. Visique inherits this rich history and commitment to Quebec. These banners have been operating for almost 100 years in the province. To learn more please visit visique.com.
