Health Canada Approves New CooperVision Biofinity® toric multifocal Contact Lenses

RICHMOND HILL, ONTARIO, May 14, 2020—Health Canada has granted [CooperVision Inc.](http://www.coopervision.ca) approval for its new Biofinity® toric multifocal contact lenses.

The highly-anticipated product combines the proven optical designs of CooperVision's Biofinity® toric—the lens you can count on —and Biofinity® multifocal, to provide patients with both the astigmatism and presbyopia vision correction they deserve. The company plans to make the lenses available to Canadian eye care professionals later this year.

"Biofinity® toric multifocal extends the reliable performance of our Biofinity® toric lenses to presbyopic patients," said Michele Andrews, OD, Senior Director, Professional and Academic Affairs, North America, CooperVision. "Canadian eye care professionals will soon have an easy-to-fit, familiar lens design they can count on to keep current toric wearers satisfied in contact lenses for longer, and provide new astigmatic wearers an alternative to reading glasses. It's a win-win for practitioners and their patients."

Lens parameters and other details regarding Biofinity® toric multifocal will be made public in the coming months. For more information, visit mycoopervision.ca.
