

Transitions®: the clear lens that adapt to light for the perfect protection!

Did you know *Transitions*® has a lens for all your patients experiencing any level of light sensitivity? It's true. *Transitions*® *Light Intelligent Lenses*™ seamlessly adapt to changing light situations by responding to surrounding light, changing from clear to dark when going outdoors and changing back to clear once inside. This is the only one smart clear lens that adapt to light and become dark in order to give to your patient this level of benefits

Plus, all *Transitions* lenses block 100% of UVA and UVB rays and help protect against sources of harmful blue light<sup>1</sup> including digital devices, screens and especially bright sun. By optimizing the amount of light eyes receive, *Transitions* lenses also help reduce glare for more effortless sight.
