

Move to U.S. Manufacturing Boosts CooperVision Biofinity Toric Multifocal Delivery Speed by 50%

Made-to-Order Contact Lenses Now Ship to Canadian Customers in Approximately 10 to 15 Days

Richmond Hill, ON., March 30, 2023—CooperVision has accelerated North American delivery times by more than 50% of all Biofinity® toric multifocal contact lenses for U.S. and Canadian customers after transitioning the manufacturing to its New York production facility in late 2022. All trial lenses and six-packs of the made-to-order lenses now originate from CooperVision’s technologically advanced facility in Scottsville, N.Y., reaching Canadian customers in 10 to 15 days, on average.

To ensure that eye care professionals (ECPs) can provide a lens to meet the unique needs of every patient, Biofinity® toric multifocal lenses are available in more than 200,000 unique prescription options.¹

“CooperVision’s made-to-order advantage enables us to offer highly customized contact lenses in very little time,” said Brian Filan, Director of Marketing, Canada. “By moving Biofinity® toric multifocal production from the U.K. to the U.S. for our North American customers, we make and deliver these sophisticated lenses to our customers and their patients even faster—with most orders shipping in just a few days.”

“The faster, consistent Biofinity toric multifocal delivery times have made a huge difference for our practice. We are able to schedule patients for follow-up appointments and adjust the prescription if needed for new trials in a more timely fashion,” said Aaron Stewart, OD, who practices at PersonalEYES Vision Care in Grand Rapids, Mich. “As a result, we are prescribing the product much more frequently, and seeing great success with it.”

CooperVision Biofinity® toric multifocal combines the comfort and proven optical designs of Biofinity® toric²—the most prescribed toric lens on the market³ and Biofinity® multifocal. Like all Biofinity® silicone hydrogel lenses, Biofinity® toric multifocal features CooperVision’s Aquaform® Technology, which offers superb breathability and higher moisture content to keep eyes comfortable and healthy.^{4*}

Biofinity® toric multifocal orders for other markets continue to be manufactured at CooperVision’s U.K. facility.

² CVI Biofinity toric multifocal lenses combine the comfort, proven optical designs and trusted technology of Biofinity toric and Biofinity multifocal contact lenses.

³ Biofinity toric is the most prescribed toric lens on the market; CVI internal data.

4 Aquaform Technology, a CooperVision technological breakthrough, allows <Biofinity / MyDay> lenses to have superb breathability, combined with higher moisture content. This keeps you comfortable and your eyes clear, white and healthy. What's more, all <Biofinity / MyDay> lenses have a smooth, naturally wettable lens surface that resists deposits, so you get incredible comfort and clarity that lasts all day. FOOTNOTE: *During daily wear.

About CooperVision

CooperVision, a division of CooperCompanies (NYSE:COO), is one of the world's leading manufacturers of contact lenses. The company produces a full array of daily disposable, two-week and monthly soft contact lenses that feature advanced materials and optics, and premium rigid gas permeable lenses for orthokeratology and scleral designs. CooperVision has a strong heritage of addressing the toughest vision challenges such as astigmatism, presbyopia, childhood myopia, and highly irregular corneas; and offers the most complete portfolio of spherical, toric, and multifocal products available. Through a combination of innovative products and focused practitioner support, the company brings a refreshing perspective to the marketplace, creating real advantages for customers and wearers.
