Eschenbach Introduces the New Adjustable Elumentis LED Lamp

Danbury, CT – May 2023

Eschenbach Optik of America, Inc. introduces the new Elumentis LED Lamp which provides bright, adjustable illumination which improves contrast and helps those with vision loss from macular degeneration and other eye diseases see better. The lamp features intuitive operation and allows users to select the optimal light color temperature and brightness level they need to maximize their viewing environment.

The energy-efficient LEDs last up to 25,000 hours, are dimmable, and provide light in three different color temperatures - from warm white 2700K, to neutral white 4800K, to cool white 6400K. The desired color, brightness and ambient light option can be selected by using the tactile buttons on the lamp base.

The Elumentis LED lamp extends up to 21 inches tall and can reach over most computer monitors to provide illumination onto a computer keyboard. The lamp head tilts in several directions and the lamp arm can be moved from the top and bottom joints allowing the user to position the light exactly where needed, making it helpful for doing hobby work, arts and crafts or reading. It also folds down to just 2.5 inches high for easy portability and storage.

This unique lamp not only offers a high color rendering index and shadow-free illumination, but also has an ambient light option that provides illumination from the top of the lamp head which can help brighten a room. The sturdy base has anti-slip pads on the bottom to increase stability and protect sensitive surfaces it may be placed on.
