GIGI STUDIOS presents Black & White, the new capsule collection that captures the powerful contrast between these two shades

The six models in the Black & White capsule collection reflect GIGI STUDIOS' passion for visual harmony and the search for beauty in proportions and lines —black and white acetate laminations in a limited-edition collection that pays homage to Op-art and optical illusions. Light and shadow, yin and yang, Black & White captures the essence of form and design, highlighting the subtle and precise rather than the saturation of colour.

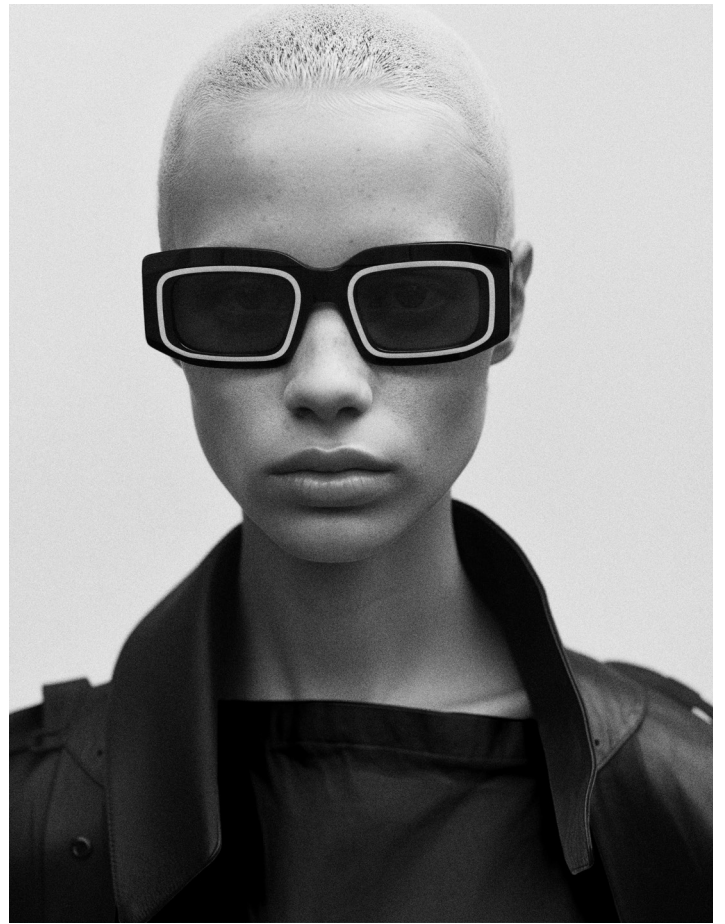

The Black & White capsule collection comprises three sun and three optical designs, all crafted in the highest quality Italian acetate. The sunglasses are CONTRAST, square with an eye-catching front; VICEVERSA, a statement model with a cat-eye touch; and CHESS, an oversized geometric design. All sunglasses in the capsule collection have been created in three varieties of black and white with bold new combinations of black and white laminations.

The new optical designs are the square-shaped EXTREME, the round-shaped ANALOG and the geometric ILLUSION. All three designs combine black and white in various ways: subtle and contrasting, symmetrical and asymmetrical. Each of these models is available in two combinations of the starring shades.

The GIGI STUDIOS Black & White capsule collection interprets one of the most striking and ground-breaking artistic movements through statement eyewear for avant-garde personalities.
