Eschenbach Optik of America Introduces New Blue-Light Blocking Readers with Anti-Fog Technology!

Danbury, CT – May 28, 2025

Eschenbach Optik of America, Inc. has launched a new Blue-Light Blocking Readers that also include anti-fog technology—a line of stylish and functional reading glasses designed to enhance visual comfort and reduce eye strain. These premium readers feature innovative lenses that block 30% of potentially harmful blue-violet light (between 400 and 455nm) emitted by the sun and digital devices, helping to create a more comfortable viewing experience for users in both indoor and outdoor settings.

The Blue-Light Blocking Readers feature lenses that are equipped with an anti-fog coating to minimize lens fogging, are scratch and impact-resistant for long-term durability, and come with a protective hard clamshell case for safe storage when not in use.

To complement the innovative lens technology, each pair is crafted with lightweight and durable polycarbonate frames with spring hinge temples which provide a comfortable and customizable fit for extended wear. The readers are available in 5 fashionable frame styles—Corey, Parker, Joey, Berry, and Eric—each offered in a range of diopters including +1.00D, +1.50D, +2.00D, +2.50D, and +3.00D. Higher magnifications of +3.50D and +4.00D are also available in the Joey and Corey models. All of these readers also include a 1-year warranty, ensuring customer confidence and satisfaction.
