

SILMO Academy Congress

6-8 APRIL 2026

📍 BALI – INDONESIA • HOTEL PARADISUS

SILMO Academy takes off for Bali!

After several successful editions, SILMO Academy continues its mission of excellence, training, and knowledge sharing in service of vision and optical professionals.

In 2026, a new and ambitious milestone awaits: for the first time, SILMO Academy will land in Bali for an **international congress dedicated to visual health, research, and innovation**.

For three days, **from April 6 to 8, 2026**, international experts, researchers, educators, and practitioners will come together to explore, learn, and exchange ideas on the major challenges shaping the future of optics and optometry.

A scientific program of excellence

Five thematic sessions will structure this edition:

- **Putting People First**
Placing the human being at the center of optical practice and patient care.
- **Healthy Ageing**
Exploring preventive and therapeutic approaches to the visual challenges of aging.
- **Gaining A Competitive Edge in Practice**
Enhancing the performance, differentiation, and sustainability of professional practices.
- **Light Management**
Understanding, anticipating, and controlling the effects of light on vision and eye health.
- **Future Advances in Optometry and Optics**
A forward-looking perspective on emerging technologies and research that will transform the profession.

Organized under the aegis of SILMO Paris, this edition of **SILMO Academy Bali 2026** will offer a rich and inspiring program, combining high-level scientific content, shared experiences, and international perspectives, all in an exceptional setting. A unique opportunity not to be missed for all professionals who wish to anticipate the evolution of their field and actively contribute to the future of global visual health.
